Earth Hour 2017: Pedal Power Cinema, Footscray, Victoria, Australia, 24 March 2017.

As part of an innovative tribute to Earth Hour, Footscray City College and Maribyrnong City Council hosted a pedal powered cinema to spin the important sustainability message.

Volunteers pedaled through the day and night on specialised bikes to generate enough energy to power the screening of a full length feature film.

On the night, people gathered to watch 'Hunt for the Wilderpeople' on the big screen, and enjoy a picnic under the stars.

On Saturday 30 March 2019 at 8:30 p.m. local time, millions of people around the world will unite once again to show their commitment to a healthy, sustainable future – and planet – for all. As our one shared home faces the dual challenge of accelerating climate change and staggering biodiversity loss, this year Earth Hour will focus its efforts on galvanizing mainstream support for action on biodiversity, our planet’s best defense against climate change.

Australians all across the country can register their event and support on the [Earth Hour website](http://www.earthhour.org.au).

Go to <http://events.earthhour.org.au/> to search for Earth Hour events taking place in your area as they become available.
